

Homework #4

Due Tuesday Sept 20, 2011

Econ 29000

Kevin R Foster, CCNY

For this exercise your study group may hand in a single assignment. When submitting assignments, **please include your name and the assignment number as part of the filename**. Please write the names of your study group members at the beginning of your homework. These assignments may be made public and available to all members of the class.

1. What are the names of the people in your study group?
2. Using the PUMS data, state a hypothesis that can be tested using the available information there. Carefully specify the null hypothesis, the distribution of the test statistic, and the conclusions from the hypothesis test. Do this twice more, for three hypothesis tests in total. Write a careful short overview – don't give me raw output (except as appendix)!
