

Homework #11

Due Thursday March 22, 2012

Econ 20150

Kevin R Foster, CCNY

For this exercise your study group may hand in a single assignment. When submitting assignments, **please include your name and the assignment number as part of the filename**. Please write the names of your study group members at the beginning of your homework. These assignments may be made public and available to all members of the class.

Using the SPSS data from the ATUS (available on Blackboard), make at least 3 interesting hypothesis tests for differences in averages between two groups (like we did in class). Explain about what can be inferred from these differences.
