

Homework 5

Due Tuesday March 15, 2016

Economics of Sustainability

K Foster, Colin Powell School CCNY, Spring 2015

You are encouraged to form study groups to work on these problems. However each student must hand in a separate assignment: the group can work together to discuss the papers and comment on drafts, but each study group member must write it up herself/himself. When emailing assignments, please include your name and the assignment number as part of the filename.

1. What are the names of people in your study group?
2. Please read a few of the fundamental reports on economics of global climate change. These will be the basis of much further reading that we'll be doing. Write a short (approx. 1 page) summary of each.
 - a. Stern, *Executive Summary* 2007
 - b. Nordhaus, review of Stern, JEL 2007

The 2 overview short papers by Stern and Nordhaus in Science are a good way to understand the broad issues. We will read more later.
