

Homework 4

Eco 10350, Prin of Macro, Kevin R Foster, Colin Powell School at CCNY

Due 8am Friday March 1

(I think of the deadline as being midnight somewhere on the planet after class, operationalized as 8am EST in NYC on day after)

Each student should submit a separate assignment, even if it is an identical computer file to the rest of your study group. When submitting assignments, please include your name and the assignment number as part of the filename. Please write the names of your study group members at the beginning of your homework.

1. What are the names of the people currently in your study group? (could be null set for now, although I wouldn't advise that to be optimal in long run)
2. In the OpenStax textbook, please answer 8.32, 8.35, 8.45; 9.33 and 9.34.
3. Go to the IMF's World Economic Outlook and examine the data for a particular country (your choice of which one). [If you're in a study group then perhaps each person can choose a different one] What has been the recent history (10 years) of growth in nominal GDP? Real GDP? Real per capita GDP? Consumption? Investment? Exports & Imports? Explain perhaps with graphs or simple tables.
